Re: Form Bait Farm

Dear Supervisor Crawford:

I appreciate your call of last week regarding the activities at the former McIntyre Bait Farm and any future plans.

Last summer, the owners of the property, Sterling Springs, LLC, a 100% women owned business, installed a stainless steel well sleeve; replacing an adjacent steel sleeve. In addition to installation of the sleeve, they had the property mowed and all the buildings cleaned of any debris.

The owner's plans in 2021 and the foreseeable future are to farm the property and use the buildings for storage.

While in the future, we may consider constructing a water bottling plant, we would first meet with the Town Board and Department heads. The owner of the company has no interest in doing anything that doesn't have overall positive impact to the majority of the community citizens. As I mentioned, the owners would share profits with the employees and the community.

Supervisor Crawford, we thank you for reaching out to us and can assure you and the Board that you will be the first to know if we seriously consider building a bottling plant.

The owners do believe that drinking bottled water is much better, and a healthier alternative than sugary drinks, especially for our children.

Please contact me at your convenience should you have any further questions.

Sincerely,

Bill Huntress
