Scott,

Per your request, attached is the Town Wide planning document hydraulic model that was produced originally when C2AE started planning the Town's water system. We've updated the model several times since it was originally produced. The model is based on the currently proposed tank location on Schoolcraft Road.

Note when C2AE started working for the Town in 2013, Town wide questionnaires were sent and, based on the responses and coordination with the Town, we immediately proceeded with the development of WD #1, with WD #2/#3 not far behind. As stated previously we did not perform a Town wide "master plan". We knew we needed the tank to serve other areas of the Town. We did consider the entire Town when designing the tank and system (i.e. pipe sizing etc.).

Please let me know if there are any further questions/concerns.

Happy Holidays!

Good Afternoon All,

As discussed at our meeting this past Monday, please see attached highlighted map and proposal to perform questionnaires for development of Water District #4.

The areas identified on the map can be tweaked as necessary.

Also the fee is proposed as time and materials, so if we don't spend all the \$3k we won't bill you for it.

Any questions/concerns please do not hesitate to reach out.

Have a good weekend!
