Stefan House

2:43 PM (41 minutes ago)

to me, Susan

Good evening

I am Stefan House. I live on Richmond Ave in Fair Haven

I have the following questions for the board regarding protecting our drinking water;

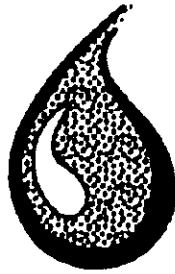

According to the Comprehensive Plan for the town of Sterling and the village of Fair Haven, a large percentage of the residents are in favor of taking measures necessary to protect our aquifers and wetlands. They are also in favor of regulations to determine what sort of businesses would best serve our community, encouraging tourism and historic preservation.

How would either large scale water extraction or a bottling plant proposed by Sterling Springs Water LLC benefit the town of Sterling or the village of Fair Haven?

What plan is there in place to ensure that large scale water extraction will not adversely affect our water supply?

Thank you for considering my questions, I look forward to your response.

  
PO Box 512, Fair Haven, NY 13064

.....

The aquifer that provides Fair Haven and Sterling with water had it's last drawdown test in 1987. The last updated requirements were posted from the DEC in 2012.

When does the town plan on holding a drawdown test on the existing wells and the surrounded sensitive areas? And what are they going to do with that information?

.....

Thanks for your time!

I look forward to hearing your answer!

Caren Thompson

A redacted signature area consisting of two thick, horizontal black bars. The top bar is shorter and positioned directly below the name 'Caren Thompson'. The bottom bar is longer and positioned below the top bar, extending further to the left and right.

My name is Anne Garland and my husband Paul and I have lived on Church Street, Fair Haven for more than fifty years.

During this time, we've seen many changes. Most recently, new homes are being built, and businesses are increasing. According to the Town of Sterling Comprehensive plan, a large percentage of the town residents favor residential and commercial growth and tourism.

How can our water source be protected when it is unclear that there will be sufficient clean potable water to provide for future residential and business expansion?

Thank you for the opportunity to share my concerns.

Address: 14414 South Fancher Ave. Sterling, NY 13156

Lead In Question; What acts, actions, discussions have occurred, by this board, regarding the protecting of the small Fair Haven well aquifer?

- Are there any documentation and or conversations from the Sterling Springs LLC. Concerning or indicating their use and or their plans regarding the aquifer they have drilled into?
- Has Sterling Springs LLC or the parent company done any environmental assessments regarding the effects of their drawing various time related volume drawings of water from the well or wells they may now have or in the future have?

As a resident of the town and also of Fair Haven village what help of information from me would be useful to this board to support this board in developing some sense of future protection of the only fresh, clean, potable water source I have?
